

Aetaire – real life testimonies

Gerhard's story

Since my school days I suffer from sinusitis. Several years of visiting doctors, homeopaths and the best ENT specialists in the Cape, did not help at all. No medication, nasal sprays or alternative medicines helped. For a few years I had to use combinations of medication to at least be able to sleep at night and even then I woke up in the early hours of the morning not being able to breathe.

When offered the distributorship for the Aetaire, I was very sceptical about the product and decided not to add that to our line of products. After a health scare in October 2011 I decided to buy one and try it.

Since the first night I completely stopped using medication and I wake up in the morning refreshed. My wife also sleeps better, because I do not wake her up at night with my constant battle to breathe. When away from home, I once again find it difficult to breathe at night and feel tired the next morning.

From now on the Aetaire will travel with us!

Nadine's story

Last year December 2010 to January 2011 my son was really very ill, that he almost died, he was only 21 months old at the time. The doctors till today don't know what was wrong with him, all we know is that his immune was at its lowest.

For six weeks long we were hospital in, hospital out. We had to screen the people that we would go visit, if we went to visit or who would in turn visit us, we were not allowed to go near people that were sick, not the slightest symptoms of a contagious sickness. If he got sick it was really bad.

In between all this of him being so sick, I had given birth to a little baby girl This was now even worse as a new born baby in the house and a child that is sick with what we don't know. Sleeping patterns were interrupted he would wake up in the middle of the night screaming and crying.

Gerhard had then lent me the Aetaire to use to see what difference there is in my son. We could see a huge improvement in both my children, sleeping at night was a dream. He slept

right through, his mood was totally different and he wasn't sick anymore. We can now lead a normal life again.

Johan's story

We went away for the weekend and did not take the Aetaire with.

Josephine (8) struggled with a blocked nose and was very uncomfortable during the night.

Tuesday night, back at home, she slept right through and felt much better the following day.

The Aetaire works definitely.

Sydney's story

My name is Sydney Eaby, I am 52 years old and I live in Villiersdorp in the Western Cape.

I have suffered from chronic respiratory allergies since moving to the Cape from Kwa-Zulu Natal in 1994.

Symptoms included constant sneezing, coughing, tightness in the chest - to the point that I could not sleep at night, burning eyes and having to blow my nose more than anyone I had ever met in my life.

I have tried every solution that I know of; anti-histamines (many different types), cortisone (sprays and injections), asthma pumps (under doctors direction), homeopathic remedies and even natural medicines such as locally made honey. All of them helped a bit and for a while.

Then I installed a Aetaire Air Disinfection Unit in my bedroom.
The results were immediate!

I woke the next morning with a clear chest, no irritation in the eyes and realized that for the first time in a very long time I did not wake up needing to blow my nose. I have found that if I use the Aetaire through the night and breath in the clean air for those eight hours I do not even get the hay fever symptoms during the day when I am out and about.

I have always been very cautious and skeptical when anyone recommends an answer to allergies - but I recommend the Aetaire without reservation. Aetaire also claims that breathing clean, pure air while I sleep will also help in many other areas including having more energy - I look forward to proving them right.

Tony's story

My daughter Liezel Ewels is a 3rd year bcom acc student at Rhodes University in Grahamstown.

From the age of 2 she has been prone to Asthma attacks and is extremely allergic to dust mites, cats, pollen etc, and over the years we have spent a fortune on medication, none of which offers a lasting solution to her problem, with only the symptoms being treated. In the 2.5 years that she has been in res in Grahamstown, we have noticed that within 12 hours of her arriving home for vacation or even a weekend, she has an allergic reaction to what we assume is dust mites etc in our house. This happens without fail every time she comes home, irrespective of the season.

A few weeks ago I installed an Aetaire in her bedroom and switched it on 5 hours before her arrival. I left it on low for 12 hours per day for the 4 nights that she was home. For the first time ever, she showed absolutely no sign of any reaction whatsoever and by her own admission felt the best she ever had on a home visit. I must assume that it was the Aetaire sterilizer that did the trick. She is looking forward to many more healthy home visits in the future.
