

ECO-FRIENDLY WATER TREATMENT

UV Pool application

- No red eyes or irritated skin
- Saves electricity
- Swim with eyes open
- **No pollution!**
- **Save water – use backwash water in the garden**
- Effective against all micro-organisms
- Use your pool as a reservoir, with UV treatment the water contains no harmful chemicals and is safe for use around the house
- 316L Stainless Steel
- **UV-C Ionizer** – Low dosage Copper keeps algae under control when the pump is not running
- **Ozone UV-C** – Ozone breaks down natural fat (including sun tan lotions) that forms oily skin on the water

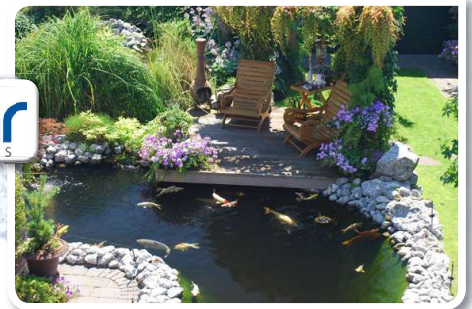

Blue lagoon

Pond / Water Feature / Koi

- 304 Stainless Steel
- **UV-C Tech**
- **VGE PRO INOX** – For commercial and Industrial use

xclear
UV-C & FILTERS

Potable Water

- High pressure UVs, from 75w to 2kW
- **VGE PRO INOX** – UV-C radiation neutralizes bacteria (including Legionella bacteria), viruses and other primitive organisms and prevents propagation
- **UV-C Pro 8L** – Build-in electronic ballast.
- **Immersion UV C** – Submersible UV-C lamps. Keep the water in your tank sterile

Industrial Water

- High quality of manufacture and high disinfecting performance
- **Master Blaster** – 2kW HDPE or stainless steel. Designed to treat highly polluted water or high flow conditions.

Master Blaster

VGE PRO
PURIFICATION EQUIPMENT

Disinfection of treated effluent

- **UV-C Tech** – Reduce chlorine by 80%
- **VGE PRO INOX** – For commercial and Industrial use
