

Eco-Friendly Water Treatment

UV Pool application

- No chlorine, no salt
- No red eyes or irritated skin
- Saves electricity
- Swim with eyes open
- **No pollution!**
- **Save water – use backwash water in the garden**
- Effective against all micro-organisms
- Use your pool as a reservoir, with UV treatment the water contains no harmful chemicals and is safe for use around the house
- 316L Stainless Steel
- UV-C Ionizer – Low dosage Copper keeps algae under control when the pump is not running
- Ozone UV-C – Ozone breaks down natural fat (including sun tan lotions) that forms oily skin on the water

UV-C & FILTERS

Pond / Water Feature / Koi

- 304 Stainless Steel
- From 5W to 2kW UVs available.

Potable Water

UV-C radiation neutralizes bacteria (including Legionella bacteria), viruses and other primitive organisms and prevents propagation

- High pressure UVs, from 75w to 2kW
- Immersion UV C – Submersible UV-C lamps. Keep the water in your tank sterile

Immersion UV C

Industrial Water

- High quality of manufacture and high disinfecting performance
- VGE PRO HDPE – 2kW HDPE or stainless steel. Designed to treat corrosive water or high flow conditions. Suited for all kinds of disinfection.

VGE PRO INOX

30% more effective due to UV radiate

VGE PRO HDPE

For corrosive water / salt water applications

Disinfection of treated effluent

- UV-C Tech – Reduce chlorine by 80%
- VGE PRO INOX – For commercial and Industrial use
