Drop-in wastewater treatment

Quick - Simple - Easy - Neat - Tidy

This is not the tag words we will find synonymous with the title, Wasterwater Treatment, but at Maskam that is something we proud ourselves in offering you. Just how quick can it be done?

We arrived at the installation site at 8am the morning. The hole for the Fusion ZF450 installation was already prepared where the client wanted the installation. The Fusion unit itself arrived at 8:38 and we sprung into action getting it setup properly and fitted neatly into its hole. Dedicated work we got the installation finished and the Fusion ZF450 running by 3pm.

7 hours is how quick it was to get this quality wastewater treatment system installed.

We would love to hear from you!
